SKILLS

PROGRAMMING

Languages:

• HTML • CSS • JavaScript • Python

Frameworks & Libraries:

• Bootstrap • jQuery • Django
• DRF • SCSS • REST API • Ajax
• React.js (Newbie)

Tools & Technologies:

• VS Code • Git & GitHub • SQLite
• MySQL Database • PostgreSQL
• AWS S3 • Netlify

Design:

• Adobe XD • Figma • Illustrator
• Photoshop

Others:

• Agile Development • Problem-solving
• Good Communication • Teamwork

INTERESTS

• Artificial Intelligence • Badminton
• Instagram • Cricket • Learning new Skills

EXPERIENCE

UPWORK & FIVERR | Full Stack Web Developer

Jan 2021 – Present

- Developed a Patient Document Management System and created RESTful APIs for seamless and secure document uploads, utilizing base64-encoded strings converted to files stored in AWS S3 bucket (Django).
- Implemented secure document downloads through the doctor and patient portal, with time-limited download links.
- Utilized JWT for API authentication, ensuring secure access to the Patient Document Management System and maintaining data integrity (DRF).
- Designed and developed an AI tools and news listing website, leveraging Ajax and Django, to enhance worldwide exposure. Achieved excellent performance and optimization.
- Developed a web application for WhatsApp campaigns, utilizing user wallet credits. Integrated Stripe for seamless payment processing and convenient credit top-up functionality (Django).

MARKALYTICS | Full Stack Web Developer

Oct 2022 – Present

- Designed Pickleball Tournaments management website and integrated with existing asp.net backend using HTML, CSS, Bootstrap, JS, and Razor Pages.
- Designed SpamKill Landing Page with 100% Google PageSpeed Insight score.
- Trained fellow developers related to Frontend Development (HTML, CSS, JavaScript, Bootstrap, jQuery).
- Automated the Apartments management for Zen Apartments to reduce human errors while creating customized payment plans for their customers. Frontend and Backend (PHP/Laravel).
- Integrated Invoice management, automatic notifications and invoice surcharge into Zen Apartments.
- Helped in customizing WordPress websites using HTML, CSS, and JavaScript.
- Developed a Watt Caddy landing page with a contact form integration (PHP).
- Coded a booking management system for Watt Caddy to book multiple electric golf caddies (PHP/Laravel).

IZANDU ENTERPRISE | Frontend Web Developer

Nov 2020 – Dec 2021 | Full-Time

- Worked with a team of 3 developers to build different money transfer websites for iFlexApps, an ambitious venture from Congo, Africa.
- Created a currency converter for iFlexEloko to help people understand fees for different payment methods before sending money.
- Increased Customer retention by designing responsive and fast-loading PWAs for iFlexApps (iFlexWallet).
- Helped solidify a brand direction for Izandu & iFlex to span across print & web.
- Interfaced with clients to discuss issues, providing technological expertise and knowledge.
